

# VERY HEAVY-DUTY TWIN ROTOR SLASHER

*For the most demanding operations*

*Very Heavy-Duty Twin Rotor Slasher fitted with 240hp driveline is ideal for more demanding slashing operations. Rigid plate headstock connected to underbody structure supports. 8mm height adjustable sides with 12mm hardened steel skids and heavy duty gearboxes & PTO shafts.*

A twin, 360 degree rear castor wheel assembly is standard fitment. Wheels fitted are 5.00 x 8 segmented rubber tyres (puncture proof), cutting height control is by the adjuster bar. Shock loadings between gearboxes are absorbed by power matched 'heavy-duty torque cushion couplings'. Suitable for 90 to 180hp tractors (subject to compatible tractor specs).

## STANDARD FEATURES:

- 6mm deck plate material
- One piece, fixed headstock with slotted top link
- Cat 2 x 3PL
- Height adjustable 8mm side plates with simple 'lock & dog' height adjustment
- Sides fitted with 100 x 12mm spring steel skids
- Comer 240hp gearboxes @ 1000 PTO
- T80 series PTO shaft & 4 plate clutch
- Heavy duty torque cushion couplings
- Spring steel rotor-beam and 100 x 13mm swing back blades on hardened bushes
- Heavy-duty twin rear 360 degree rear castor assembly with parallelogram king pin alignment, height control by ratchet adjuster
- Puncture proof tyres fitted (2)
- Front and rear safety debris chains
- Over-run clutch

## COMPLIMENTING OPTIONS:

- Cat 3 linkage 'Quick Hitch' pick-up available (check with CGE for matching specs)
- Drawbar pull, trailing model, includes wide angle PTO shaft and aircraft landing wheels (2)
- Upgrade to heavy-duty twin rear castor wheel assembly with parallelogram king pin alignment, in lieu of (2) segmented tyres
- 6.00 x 9 industrial forklift steer tyres (4), heavy-duty king pin
- Puncture protection filled tyres (4)

Available cutting sizes:  
2.215mt, 2.86mt & 3.52mt
